

KALTECH MINING SERVICES LTD.

Pay transparency report

Kaltech provides highly specialized mining services in the area of grinding mill relining and is recognized as the world leader in this field. Mill relining is the process whereby the metal liners in the grinding mills used by mines are removed and replaced. Relining is a difficult, multi-faceted, and potentially hazardous activity, the efficient performance of which is of great economic importance to mines in order to reduce the time that mills at the mine sites must be shut down.

Kaltech Mining Services is the Canadian member of the larger, multi-national Kaltech organization, which has worldwide operations. Kaltech Mining Services provides mill relining services at Canadian mine sites for its Canadian clients and has done so since Kaltech Canada began operations in 2010.

Kaltech has provided technical reline services to some of the largest mining enterprises in Australia, Asia, Africa, South America and North America.
